

DATA FILE 2000

KAWASAKI HEAVY INDUSTRIES, LTD.
Code No. (7012)

HISTORY

Kawasaki Heavy Industries, Ltd. (KHI) traces its origins to an industrial shipyard in Tsukiji, Tokyo, established by Shozo Kawasaki in 1878. In 1896, the Company was incorporated under the laws of Japan as Kawasaki Dockyard Co., Ltd. The Company later expanded its business to include the manufacture of rolling stock, steel, steel structures, industrial machinery, automobiles and aircraft. The Company also engaged in the shipping business through the company known as Kawasaki Kisen Kaisha, Ltd. (the "K" Line), which later became an independent company. In 1939, the Company adopted its present name, Kawasaki Heavy Industries, Ltd.

In 1950, the Company's steel manufacturing division was divested and Kawasaki Steel Corporation was formed. In 1969, Kawasaki Aircraft Co., Ltd. and Kawasaki Rolling Stock Mfg. Co., Ltd., former divisions which had been divested, were merged back into the Company, forming an integrated heavy industry enterprise.

The Company established a subsidiary in the United States to sell its motorcycles in 1969. In 1975, through its local subsidiary, the Company began to produce motorcycles in the United States ahead of any other Japanese producer of any type of motor vehicle. Subsequently, through its U.S. subsidiaries, the Company began to manufacture rolling stock in New York in 1986, wheel loaders in Georgia in 1987, and small gasoline engines in Missouri in 1989. In 1993, the Company established a local subsidiary to acquire a hydraulic machinery manufacturing business in Plymouth, U.K., its first production facility in Europe.

The Company has been seeking to expand its activities in Asia. The Company has joint ventures in Malaysia, Thailand, Indonesia and the Philippines to manufacture motorcycles. In China, KHI established four joint ventures to manufacture prime movers (1995), ships (1995), steel structures (1997) and motorcycle engines (1997).

b) Sales by subsidiaries: total subsidiaries sales minus internal sales within the segment.

c) Non-consolidated sales of consumer products and industrial robots.

TRANSPORTATION EQUIPMENT -SHIPS-

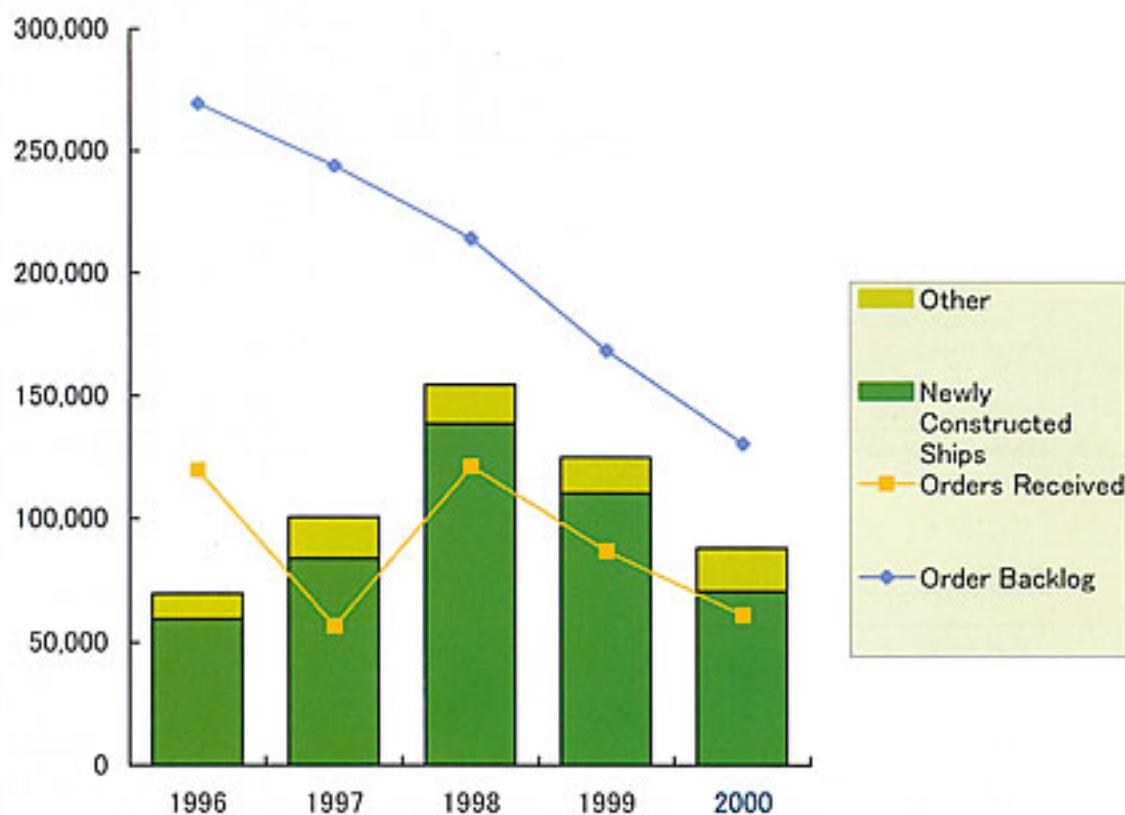

KHI has been known as a front-runner in gas carrier design and construction since it built the first LNG carrier in Japan in 1981, utilizing ultra-low temperature storage technology licensed from Moss Rosenberg Verfts A.S. of Norway. In 1989, the Company delivered its first Jetfoil, an advanced type of hydrofoil capable of smooth highspeed cruising, manufactured under license from The Boeing Company. In 1994, the Company delivered its first Jet Piercer, a new high-speed wave-piercing catamaran car ferry developed in conjunction with Advanced Multi-Hull Designs Pty, Ltd. of Australia. KHI is one of only two suppliers of submarines to the Japan Defense Agency (JDA). The Company continues to bolster its position as a premier international shipbuilder by focusing on higher value-added ships such as LNG carriers as well as faster ships.

Principal Products: ◊ Liquefied natural gas (LNG) carriers ◊ Liquefied petroleum gas (LPG) carriers
 ◊ Container ships ◊ Very large crude-oil carriers (VLCCs) and other types of tankers ◊ Bulk carriers
 ◊ Jetfoils ◊ Jet Piercers ◊ Submarines ◊ Maritime application equipment

TRANSPORTATION EQUIPMENT -ROLLING STOCK-

KHI entered into the rolling stock related field in 1906 and has advanced its standing in the markets both at home and abroad. The Company is the leading manufacturer of rolling stock in Japan and the largest supplier to the Japan Railways (JR) Group. KHI's aerodynamic technology accumulated through its Aerospace Group has been successfully applied to new types of Shinkansen with higher-speed. KHI also ranks among world's leaders in this sector. In the United States, the Company is enhancing production at its subsidiary, Kawasaki Rail Car, Inc. in Yonkers, New York. In order to respond to future demand worldwide, KHI aims to upgrade its capability as a system integrator for traffic control systems.

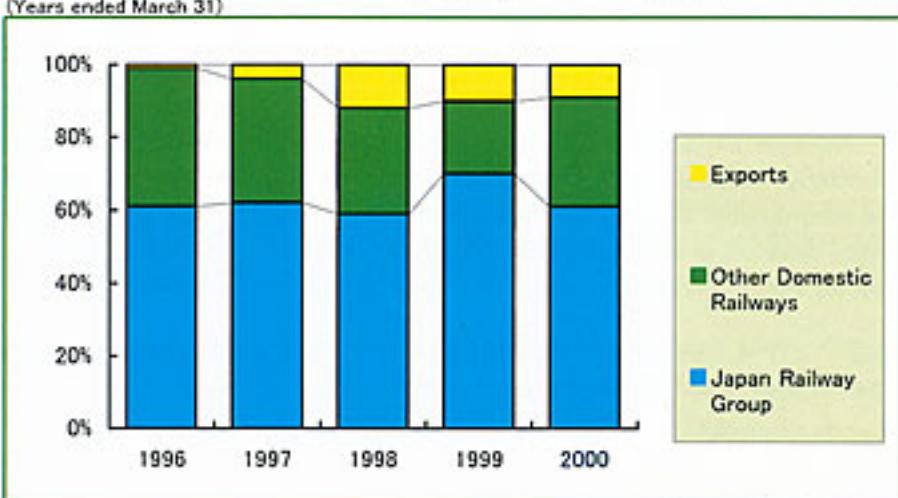

Principal Products: ◊ Electric cars for Shinkansen bullet trains, express trains and commuter trains
 ◊ Electric and diesel locomotives ◊ Passenger coaches ◊ Integrated transit systems ◊ Monorail cars
 ◊ Platform screen doors

AEROSPACE

KHI plays a prominent role in Japanese aircraft industry in both the defense-related and the commercial sectors. For Japan Defense Agency (JDA) business, the Company has been the prime contractor of the T-4 intermediate jet trainers, the CH-47J and the OH-1 helicopters. For the commercial markets, KHI is a member of joint development and production programs for the Boeing 777 and 767 passenger airplanes. It has also jointly developed the BK117 twin-engine helicopter with MBB (currently Eurocopter Deutschland). In the jet engine field, the Company has been involved in the international development and production project for the V2500 turbo-fan engines. KHI is also jointly developing and manufacturing aircraft engines with leading world suppliers such as Rolls-Royce for RB211/Trent series and Pratt & Whitney for the PW4000 series.

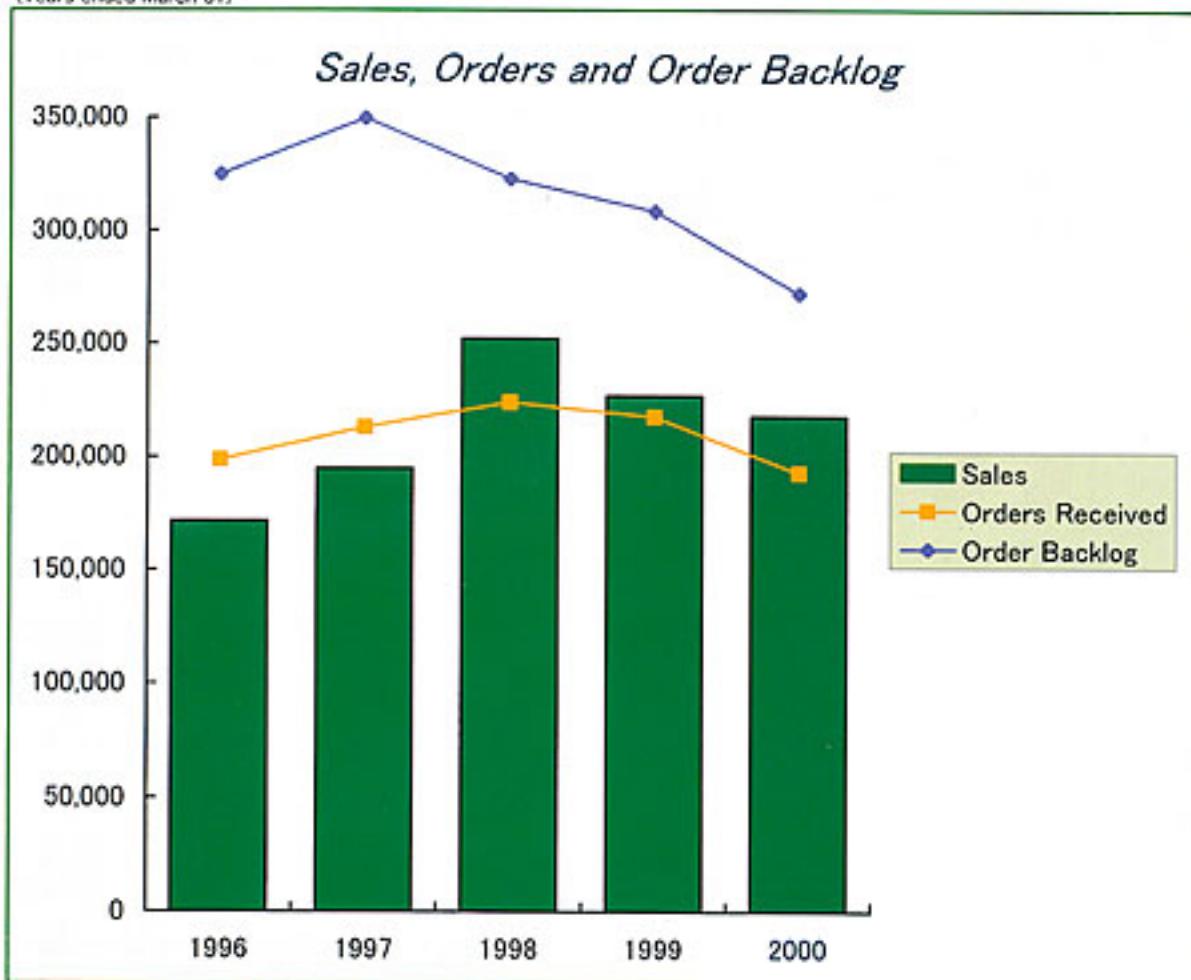

Principal Products: OT-4 intermediate jet trainers OCH-47, OH-1 and BK117 helicopters

OComponent parts for B777 and B767 passenger airplanes

OMissiles OElectronic equipment OSpace equipment OJet and gas-turbine engines

INDUSTRIAL EQUIPMENT

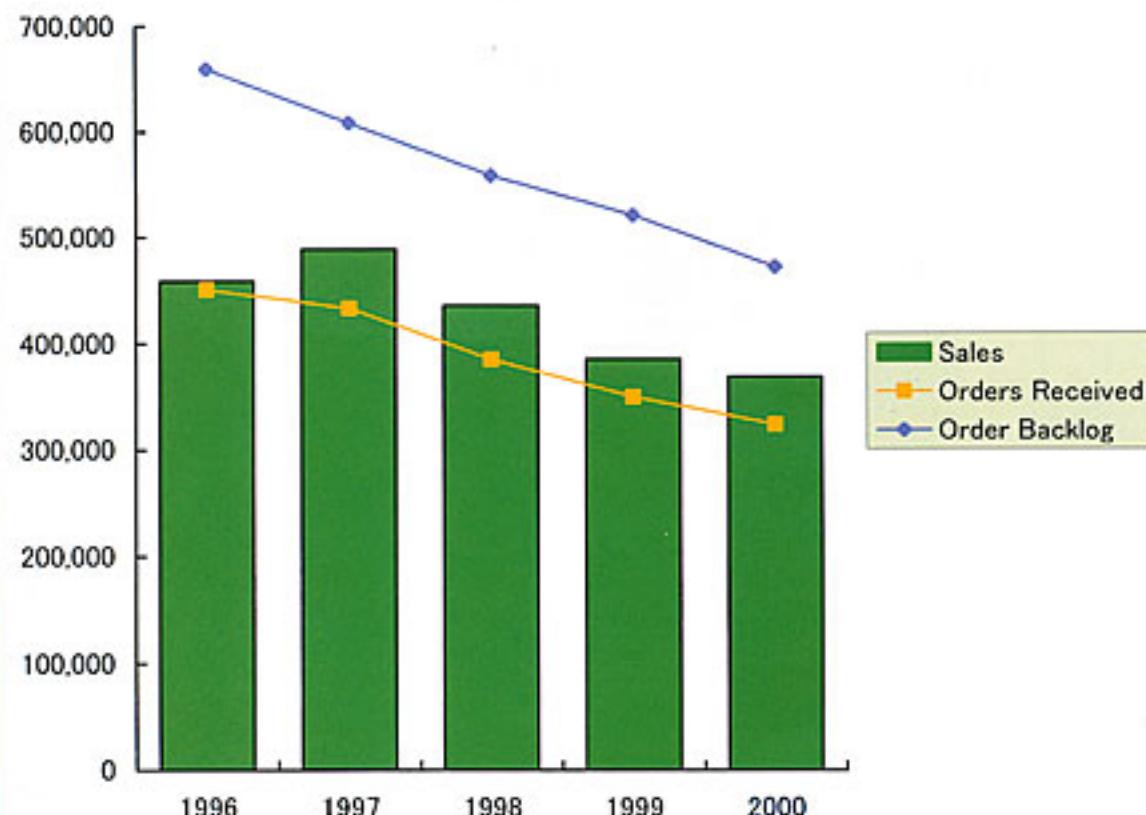

KHI is one of the leading suppliers of municipal refuse incineration plants in Japan. In 2000, it has developed fluidized bed gasified melting incineration systems, which will greatly reduce the volume of burnt ash and its accompanying emissions, while yielding clean power. In the power plant business, the Company is focusing on Combined Cycle Power Plants (CCPPs) manufactured in corporation with ABB Alstom Power. As a supplier of industrial plants and a large variety of steel structures, KHI has been involved in large-scale projects and social infrastructure projects both in Japan and overseas. KHI manufactures various industrial hydraulic equipment, ranked as one of world leaders in this field. The Company also maintains a predominant share in the market for small- and medium-sized gas turbine generators in Japan.

Principal Products: ◊ Steel-making, cement, chemical and other industrial plants ◊ Power plants ◊ Municipal refuse incineration plants ◊ Aero-derived gas turbine engines for naval vessels ◊ Bridges ◊ LNG and LPG tanks ◊ Crushing machinery ◊ Industrial hydraulic equipment ◊ Wheel loaders ◊ Small- and medium-sized gas turbine generators

CONSUMER PRODUCTS

Kawasaki brand motorcycles are the main products in this segment. The Company specializes in medium- and large-sized motorcycles and they are mainly exported to Europe and North America. Other consumer products such as Jet Ski® personal watercraft, originally developed by the Company, All-terrain vehicles (ATVs) and utility vehicles (U/Vs) are produced by its subsidiary, Kawasaki Motors Manufacturing Corp., U.S.A. in Lincoln, Nebraska. In Asia, KHI has joint ventures to produce motorcycles in Malaysia, Indonesia, Thailand and the Philippines. During fiscal 2000, to extract greater synergy in manufacturing and sales from Consumer Products' net work, industrial robots were transferred to this segment from the Industrial Equipment segment.

Principal Products: ◊ Motorcycles ◊ All-terrain vehicles (ATVs) and utility vehicles (U/Vs) ◊ Jet Ski® personal watercraft ◊ General-purpose gasoline engines ◊ Brush cutters ◊ Transmissions ◊ Industrial robots

Note: Sales, exports, orders received and order backlog of industrial robots on a parent-only basis are included in the table and the chart shown on this page.

Major Changes in Accounting Policy

Revenue recognition

Effective April 1, 1997, the method of accounting for revenue from long-term construction contracts was changed from the completed-contract method to the percentage-of-completion method. The percentage-of-completion method is applied to long-term contracts exceeding ¥5,000 million.

Under the previous completed-contract method, sales of materials and equipment for plant construction projects, contract prices of which exceeded ¥10,000 million, were recognized at the time of shipment.

As a result of this change, net sales, operating income, and income before income taxes and minority interests for 1998 increased ¥79,590 million, ¥15,203 million and ¥15,203 million, respectively, compared with the amounts which would have been recognized if the former method had been applied consistently.

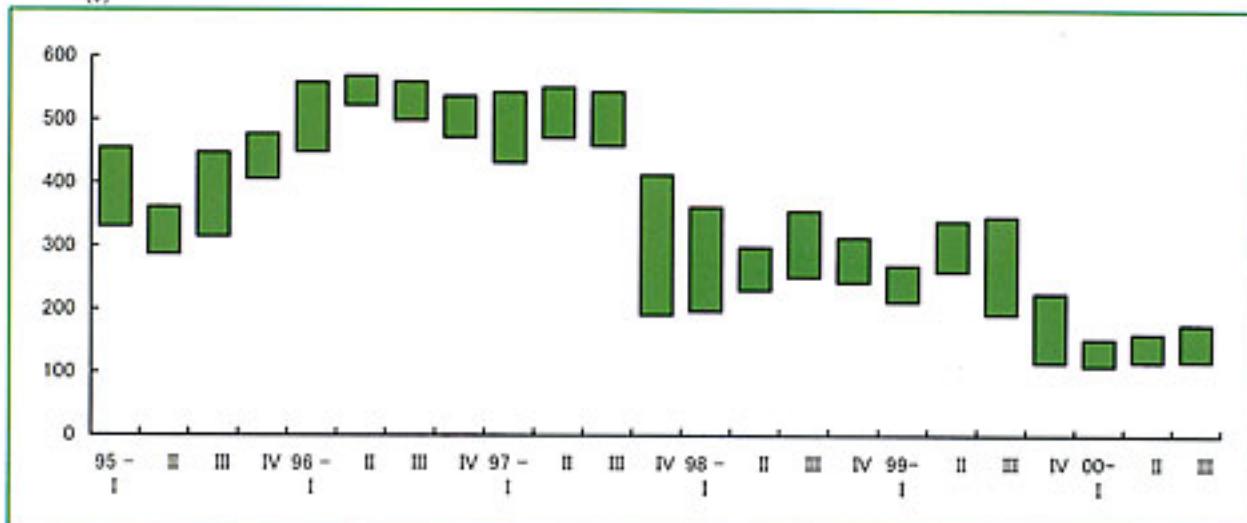

Income taxes

Income taxes were principally provided for based on taxable income for the period, determined in accordance with applicable tax laws, for 1998 and before. Effective April 1, 1998, the Company adopted the new accounting standard, which recognizes tax effects of temporary differences between the carrying amounts of assets and liabilities for tax and financial reporting.
