2. Reasons for the Revision

The forecast for net sales for the first half of fiscal year ending March 31, 2013 is expected to decrease from the previously announced forecast mainly due to the declines in the Precision Machinery and Motorcycle & Engine segments caused by economic slowdowns in China and Europe.

Operating income is expected to decrease from the previously announced forecast because of the lower sales and Rolling Stock segment's provision for loss on construction contracts in an overseas project, and so on. Recurring profit and net income is expected to decrease from the previously announced forecast but the declining margin is expected to be less than that of operating income because of improvements in gains on foreign exchange and income of unconsolidated subsidiaries and affiliates, and so on.

The outlook for performance for fiscal year ending March 31, 2013 will be announced on October 31, 2012 when the financial results for the first half of the fiscal year will be disclosed.
