

Z H2 (2020MY)

Accomplished more power and better fuel consumption while reducing the exhaust emission level remarkably

Thanks to its supercharged engine, Z H2 has outgunned the competitors with equivalent displacement normal aspiration engine both in power and fuel efficiency. Z H2 also meets the new European exhaust standard "EURO 5", featuring significant exhaust emission level reduction compared to its base model.

	Fuel consumption [km/l]	Power [kW]	Displacement [cm ³]
Z H2 (2020MY)	16.9	147	998
The competitor	14.9	121	999
Ratio (Z H2/competitor)	113%	121%

Product Description

The new flagship of supernaked Z-series
(Displacement 998cm³)

Features

- Newly designed trellis frame, optimized dimension, exclusive front/rear suspension and Ninja ZX-10RR sourced swingarm guarantee nimble handling as well as high rigidity which can accept supercharged power
- In addition to the advanced electronic vehicle control technic, Z H2 is equipped with many rider-friendly devices like full-color TFT LCD instrument panel as well as smartphone connectivity
