

Z900 (2020MY)

Accomplished significant reduction of the exhaust emission level without sacrificing the engine performance and handling from its predecessor

The new Z900 meets the new European exhaust standard "EURO 5", featuring much lower emission level compared to its predecessor.

Product Description

Z900 which showed good sales in various markets like Europe, Thailand and Malaysia has now received an update (Displacement 948cm³)

Features

- All-LED lighting (except N.America spec.) evolves Z's intrepid design
- Using LED also helps reducing the wattage in lighting system
- Traction control and TFT LOC instrument panel are now introduced
- Reviewing the chassis-center rigidity helps reducing energy consumption at production stage by eliminating the frame gusseting
