Basic CSR Policy		
Basic CSR Policy	Basic CSR Policy	The Kawasaki Group recognizes that the realization of our group mission, "Kawasaki, working as one for the good of the planet (Enriching lifestyles and helping safeguard of environment – 'Global Kawasaki')" is the most important among the social responsibility the Group should assume. We therefore are aining at solving social issues with our products and services, by positively grasping the global social issues and through the Group's pursuit of synergy and innovation. For us to be a corporation in which the society continuously places great confidence, we will promote the constructive dialogs with our stakeholders and, simultaneously, we will further strengthen our efforts in maintaining fair business practice, prevention of corrupting, consideration for environment and human rights. We will, subsequently, set the themes of CSR as well as individual domains based on identifying materiality, so that they can lead to the CSR management of the entire Group. We, we will continue such efforts considering what stakeholders expect form us and what they require, and solidify the foundation for value creation. *Reference: Identifying Material Issues (Materiality) https://global.kawasaki.com/en/corp/sustainability/materiality.otml <csr themes=""> Business - Solving social issues through business Governance (G) - Corporate governance - Depening awareness of the Kawasaki Group Code of Conduct - Anti-corruption measures - Risk management - Crisis management - Export control - Information security - Political involvement - Innovation management - Export control - Information security - Political involvement - Innovation management - Innovation management - Low-carbon society (product-based contributions) - Low-carbon society (business activities) - Recycling-oriented society</csr>

Medium-Term CSR Policy, Targ	ets, and Performance	
		y, targets, and performance In fiscal year ended March 31, 2018, the Kawasaki Group identified material issues or materiality that we should address. In parallel, we reviewed the framework of our CSR activities: We positioned efforts in solving social issues through business as top priorities that the Kawasaki Group should achieve over a long-term, and defined other issues as CSR issues that underpin the management foundation. In fiscal year ended March 31, 2019 and after, we will try to improve our CSR activities while repeatedly turning the PDCA cycles: Under a new framework, we will clearly define the departments and persons in charge, the vision, and KPIs of solving social issues through

CSR Promotion System

Deepening Awareness and Education on CSR throughout the Company Deepening Awareness and Education on CSR throughout the Company The Kawasaki Group carries out education and awareness building programs relating to sustainability and CSR for its officers and employees utilizing a variety of tools such as educational seminars and its corporate intranet. We carry out CSR and compliance education and awareness building in grade-specific seminars, such as training for new employees, and newly appointed assistant managers, managers, associate officers and executive officers, as well as in training for persons in charge of overseas businesses and seminars for mid-career hires. In addition, in order to ensure that all group employees are fully informed on CSR, we regularly provide CSR and compliance related information on our corporate newsletter "Kawasaki," and our Group-wide English and Chinese language newsletter "Kawasaki On The Move." Participation in Third-Party Initiatives and Organizations

	Participation in third-party initiatives and organizations		
		The following is a list of organizations and advisory institutions in Japan where Kawasaki	
		representatives hold official positions:	
		Shipbuilders' Association of Japan, vice-chairperson	
		Society of Japanese Aerospace Companies, vice-chairperson	
		Japan Aircraft Development Corporation, councilor and administrative officer	
		Japan Robot Association, chairperson	
		Japan Association of Rolling Stock Industries, administrative officer	
		Japan Overseas Railway System Association, chief administrative officer	
		Japan Machinery Federation, general director	
		Japan Coal Energy Center, vice-chairperson	
		Japan Association for Trade with Russia & NIS, chairperson	
		Kawasaki representatives also hold membership positions in the Japan Federation of Economic	
		Organizations (Keidanren), Japan Automobile Manufacturers Association, Japan Electric	
		Machine Industry Association, and Kansai Federation of Economic Organizations.	

State of Affairs Regarding	Stakeholders	
	The Kawasaki Group sta	Akeholders The Kawasaki Group actively acknowledges the expectations and requests of stakeholders, and strives to create social value by meeting those expectations and requests through business activities while concurrently working to raise enterprise value. We utilize stakeholder dialogue to enhance information disclosure and deepen communication, which will strengthen bonds of mutual trust. [Illustration] The Kawasaki Group Stakeholders https://global.kawasaki.com/en/corp/sustainability/overview/stakeholder.html
Stakeholder Communication	on	
	Stakeholder communica Stakeholder Communication	The Kawasaki Group works towards gaining a good understanding of and making improvements to issues by communicating with stakeholders through a variety of means in our daily business activities. Furthermore, in addition to day to day dialogs, we promote communication with experts and international institutions—positioning these individuals and entities as those who offer the views that represent our societies—and reflect these exchanges in its activities. - Referencing international codes of conduct (ISO26000, etc.) - Responsible Investing) assessments - Dialog with experts who represent the views and expectations of our societies
		 Recognizing social issues and risks, and providing solutions through our businesses Communication with NGOs and NPOs
	Customer communicatio	In Through our day to day sales activities, we carry out ongoing communication with our customers regarding their demands and desires. We also offer customer inquiry contacts and conduct annual customer satisfaction surveys suited for different product characteristics and sales styles. At the Motorcycle & Engine Company, through its subsidiaries and dealers, we receive requests, complaints, and inquiries from customers at every stage of the lifecycles of our products and services from purchase to maintenance, and scrapping. We also regularly organize motorcycle user social groups, new product announcement and social interaction events, and also safe riding classes in various regions as part of our contribution to reduce traffic accidents and support our customers' motorcycling lifestyles.
	Expectations and Dema	The Precision Machinery Business Center conducts customer satisfaction surveys on a regular basis, and results from these surveys are fed back to the design and sales divisions. This helps us to incorporate our customers' needs in products and services improvement and development. Inds Creating products and services that meet our customers' expectations and address their issues; responding to customer complaints and inquiries; appropriate disclosure of product and service information
	Shareholder and investo	The Kawasaki Group works to ensure fair, timely and appropriate disclosure based on the Disclosure Policy that we publish on our web site, and also actively communicates with shareholders and investors through a broad range of IR activities that we carry out in Japan and overseas. (Please visit our website for the details about IR information: https://global.kawasaki.com/en/corp/ir/index.html)
	Supplier communication	
	Expectations and Dema	The Kawasaki Group communicates with suppliers on a day-to-day basis at its each purchasing department. In addition, we organize training programs, liaison meetings and other events with suppliers in Japan to enable thorough communication. Furthermore, to promote CSR procurement, we have begun taking CSR procurement questionnaires from our suppliers since 2016.
	Employee communication	The Kawasaki Group issues monthly corporate communication newsletter "Kawasaki," and Group-wide English and Chinese language newsletter "Kawasaki On The Move" to provide information on our corporate activities and performance in an easy to understand format. We also provide a broad range of information and update it on our employee intranet. Furthermore, we hold grade-specific training programs where participants are able to learn about our corporate systems and setup. With regard to employee career advancement, we help employees create their future career roadmaps through dialogs with their supervisors that are held every six months to discuss their performance. Also, to create a system that reflects the opinions of our employees and with whom we have signed a labor agreement. We also conduct an employee awareness survey once every three years to gauge their satisfaction and grasp their needs. We conducted the survey of all employees and temporary staff working at group companies in Japan in 2015 and 2018. As for overseas employees, in 2016, we carried out an awareness survey of employees at managerial and higher positions.
_		Use of HR; Appropriate treatment; Promotion of labor safety and health

NGO an	 d NPO Communication The Kawasaki Group is engaged in communication with international ESG (environment, social, governance) and SRI (socially responsible investment) assessment organizations such as the Dow Jones Sustainability Index, as well as with NGOs such as Transparency International. Through such communication, we provide information to supplement surveys and assessments which are conducted based on disclosed information, and in instances where this is deemed to be insufficient, we review and effort to make changes to our information disclosure and/or our approaches. * ESG investment / SRI rating agencies: Organizations that assess companies from the perspectives of environmental, social, and corporate governance.
E.m.s.s	tations and Demonds
Expec	tations and Demands
	Incorporating a broad range of social opinions; contributing to society through not-for-profit activities
Commur	hity communication Persons in charge of our plant divisions carry out communication with community residences through their operations. Steps are taken to raise awareness to prevent noise, waste disposal and inappropriate employee behavior, and immediate steps are taken if and when complaints are received from residents. Plants and branches also organize events and activities that contribute to their communities and community residents.
Export	tations and Demands
	Fulfilling the responsibilities as a corporate citizen; participating in communities
Governm	nent Communication
Expec	The Kawasaki Group makes policy proposals by participating in the business and industry organizations. Additionally, we actively take part in industry-government-academia projects through joint research such as in open innovation projects.
	Compliance with laws and regulations; policy proposals; participation in industry-government-academia projects

Material Issues (Materiality)

Kawasaki Group 's Approach to the SDGs

Kawasaki Group's appro	bach to the SDGs		
	In 2015, the General Assembly of the United Nations adopted the SDGs which are a set of 17 goals that we should achieve by 2030 including eradication of poverty, inequality and unfairnes and response to climate change. The SDGs are specific action plans which request businesses, governments and communities around the world to address the global agenda jointly in order to realize the prosperity of humankind and the earth. It is widely believed that the contribution by business enterprises to resolve of social issues through business activities is indispensable.		
	extremely compatible w	lission—"Kawasaki, working as one for the good of the planet"—is ith the SDGs. And as we strive to provide solutions to social issues ctivities, we will most certainly contribute significantly to the is.	
	In the process of identifying materiality in 2017, we clarified the social issues that we should address and positioned efforts to maximize the social value we create through our businesses namely, providing safe and secure, clean, comfortable movement of people and transportation of goods by land, sea and air; creating clean energy; improving social infrastructure, especial in emerging countries; and responding to needs of an aging society and shortage of labor through automation, as top priorities to be achieved over the long term. As presented below, determined our contribution to the successful SDGs through an internal examination of the correlation between created social value and the 17 SDGs and 169 targets of the universal agenda and through discussion by the Corporate CSR Committee and the Management Committee, which are both chaired by the president. We set non-financial targets to achieve 2030 for each type of created social value, and will regularly disclose the status of progress toward these targets.

Material issues and our appre	bach
est cor imț rais rela	ided by the Group Mission "Kawasaki, working as one for the good of the planet," Kawasaki ablished a corporate governance system centered on directors and corporate auditors, with neternt appropriate for the activities that the Group undertakes, and efforts are made to further prove the system. The basic stance on corporate governance for the Group as a whole is to se enterprise value through effective and sound business activities while forming a solid ationship with all stakeholders, including shareholders, customers, employees and nmunities, through highly transparent management practices.
sui of f exp the	In targets a Kawasaki Group continues its various efforts to establish the corporate governance system table for the Kawasaki Group. Specifically, in order to ensure the effectiveness of the Board Directors, we carry out an assessment of current status of the Board of Directors using a asstionnaire given to all directors and corporate auditors based on the advice of external perts each year, with the aim to improve the function of the Board of Directors, and analysis of results is reported to the Board of Directors for discussion. Through this assessment and alysis, we further strengthen our corporate governance system.
Progress/results/challenges	
Api cle sup Fi We offi del	e Kawasaki Group modified the Board of Director and Executive Officer System effective ril 1, 2018, in order to further strengthen corporate governance. This change has made it ar that business execution is carried out by executive officers to promote separation from the pervisory function of the Board of Directors. Inthermore, seeking to strengthen the supervisory function of the Board of Directors with lard to overall management, we increased the number of outside directors by one. e continue to carry out the following initiatives in response to the assessment of effectiveness; The Board of Directors revise the scope of delegation of authority to directors, executive cers, and other officers in order to enable the Board of Directors to conduct focused iberation on matters of high materiality for management. In order to further energize discussions by the Board of Directors, we provide information to ectors and corporate auditors at an earlier stage, and early briefings to outside officers on a jular basis on agenda items for the Board of Directors' Meetings.

Organization	
	The Kawasaki Group adopts the statutory auditor system with a Board of Directors and Board Auditors, and appoints an independent auditor. We also have the discretionary Nomination Advisory Committee, Compensation Advisory Committee, Management Committee, and Executive Officers Committee.
Board of Directors	
	The Board of Directors comprises 12 directors (authorized number: 18), with the chairman serving as the presiding officer. We have increased the number of its outside directors (independent officers, as required by the Tokyo Stock Exchange) from two to three. These directors are independent of any role in the execution of business activities. As a result, eight the 12 directors concurrently serve as executive officers. We are seeking to strengthen the supervisory function of the Board of Directors with regard to overall management, while paying attention to the balance with its business execution function.
Board of Auditors	
	The Audit & Supervisory Board comprises five audit & supervisory board members (authorized number: five). To ensure the reliability of financial reports, we appoint internal audit & supervisory board members who have considerable knowledge of finance and accounting. Furthermore, to ensure the objectivity and neutrality of the supervisory function, we appoint three outside audit & supervisory board members (independent officers, as required by the Tokyo Stock Exchange) with no business relationships or other vested interests in the Company. The internal and outside audit & supervisory board members share information closely and work to enhance the supervisory function.

Criteria and Process for Director Appointment	
Director appointment	process
	Directors are decided by the Board of Directors based on the "qualities required of a director"
	and "gualities required of an auditor" as defined by the Board of Directors through a
	comprehensive assessment of the knowledge, experience, and capabilities that are needed for
	the person to appropriately carry out the responsibilities required of the particular director

	and "qualities required of an auditor" as defined by the Board of Directors through a comprehensive assessment of the knowledge, experience, and capabilities that are needed for the person to appropriately carry out the responsibilities required of the particular director positions, based on the performance of the Company and the individual. The professional history and reason for appointment of each director and auditor are disclosed in documents such as the notice of general meeting of shareholders. The directors and auditors appointment policy, and directors and auditors nomination proposals are decided at the Board of Directors, after consultation with the Nomination Advisory Committee.
Director appointment of	riteria
	 Qualities required of a director Possessing an in-depth understanding of and sympathy with the Kawasaki Group's corporate philosophy and visions. Being able to make positive contributions towards sustainable growth and improving mediumand long-term enterprise value. Having a corporate-wide perspective, and a wealth and breadth of experience, resourcefulness and specialized expertise to this end. Being able to oversee corporate management and business execution from an independent and objective position as a member of the Board of Directors.
	 Qualities required of an auditor 1. Being able to contribute to ensuring the soundness of management of the Kawasaki Group. 2. Possessing the ability to make fair and appropriate decisions from an independent and objective position. 3. Being able to execute their authorities in a proactive and positive manner, and appropriately voice opinions at Board of Directors meetings or to the top management. 4. Being highly knowledgeable of Kawasaki's businesses and corporate management or possessing a wealth and breadth of experience, resourcefulness and specialized expertise. 5. At least one auditor must have an appreciable degree of knowledge in the area of finance and accounting.

Reason for Appointmen	nt of Outside Directors
	Michio Yoneda Mr. Yoneda has expressed useful opinions and given advice in determining important matters of
	the Company's management from a position independent of any role in the execution of business activities, based on his abundant management experience and high level of knowledge regarding corporate governance acquired over a career including President & CEO (Member of the Board) of Osaka Securities Exchange Co., Ltd., Director & Representative Executive Officer and Group COO of Japan Exchange Group, Inc., and other important
	positions. In consideration of these points, the Company believes he would be able to fully perform his roles as an Outside Director in supervising the execution of duties of the Company and increasing its enterprise value.
	Yoshiaki Tamura
	Mr. Tamura served as Representative Director and Executive Vice President, AGC Inc. (formerly Asahi Glass Co., Ltd.), GM of Technology General Division, Deputy Leader of AGC Group Improvement Activities and President of Glass Company and other important positions. He has extensive experience in corporate management and deep insights into manufacturing. In consideration of these points, the Company believes he would be able to fully perform his roles as an Outside Director in supervising the execution of duties of the Company and increasing its enterprise value.
	Jenifer Rogers Ms. Rogers has extensive international experience and deep insights into legal affairs, compliance, and risk management, having served as an in-house lawyer and executive in charge of legal affairs at international financial institutions for many years. In consideration of these points, the Company believes she would be able to fully perform her roles as an Outside Director in supervising the execution of duties of the Company and increasing its enterprise value.
Reason for Appointmen	nt of Outside Corporate Auditors
	Takashi Torizumi The Company has judged that Mr. Torizumi would be able to fully perform his roles as outside corporate auditor from an independent position, based on his abundant experience as a corporate manager.
	Ostara Kabdara
	Satoru Kohdera The Company has judged that Mr. Kohdera would be able to fully perform his roles as outside corporate auditor from an independent position, based on his abundant experience as an attorney and high level of knowledge of legal affairs.
	Atsuko Ishii The Company has judged that Ms. Ishii would be able to fully perform her roles as outside corporate auditor from an independent position, based on her abundant experience and high level of knowledge of labor administration.

* The maximum amount of compensation of corporate auditors is ¥1,200 million per year (as resolved at the 189th Ordinary General Meeting of Shareholders held on June 27, 2012).
 * The maximum amount of compensation of corporate auditors is ¥120 million per year (as resolved at the 194th Ordinary General Meeting of Shareholders held on June 28, 2017).

	Criteria for calculating flexible compensation
	ROIC, after-tax profits
Request to Own Company Stock	s to Top Management
	Rules regarding Company stock ownership by top management
	A portion of the compensation of directors, other than for outside directors, is to be distributed in
	fixed amounts each month for the purpose of sharing value with shareholders and incentivizing
	directors to enhance medium- to long-term enterprise value, with the entire amount to be
	contributed to the officers' stock ownership plan in order to purchase shares of the Company on
	an ongoing basis.

Material issues and our	The Kawasaki Group is committed to actively recognize the expectations of our stakeholders, and to simultaneously create social value and enhance our enterprise value by contributing to their resolution and fulfillment through our business activities. From this perspective, factors that inhibit our business activities represent a serious risk. In accordance with the Companies Act, the Kawasaki Board of Directors has adopted a basic policy for internal control systems. The policy makes it clear that risk management should be addressed in accordance with the Risk Management Regulations by seeking to anticipate and avoid loss caused by risks, and to minimize risks through appropriate preparation and operation of the risk management system. In addition, to achieve sustained improvement of profitability and corporate value, the Kawasaki Group Mission Statement identifies risk management as a guiding theme of the Kawasaki Group Management Principles.
Focus activities/medium	In order to achieve Group-wide integrated risk management, respective operating divisions strengthen their risk management measures, identify major risks that may have a serious impact on operations (Group-level risks) every year, monitor how these risks are being addressed, and from among such risks determine a few items that particularly require Group-wide actions (risks requiring Group-wide action), and examine and execute such actions. The results of these actions are then monitored by the head office division in charge. On the other hand, with regard to the risks associated with individual business execution, the relevant divisions carry out assessments and analyses and sufficiently examine countermeasures in advance in accordance with the Kawasaki Group's Board of Directors Regulations, Management Meeting Regulations, Approval Regulations, etc., and for important projects which may have especially great impacts on operations, not only at bidding and contracting for received orders but after starting the projects, too, necessary measures to further ensure risk management are taken in accordance with Kawasaki Group's Regulations concerning Risk Management for Important Projects, etc. including the head office and the respective business segments following up on them regularly.
System	The Kawasaki Group has established a Corporate Risk Management System to ensure a uniform level of risk management across the Group, through which it identifies and responds to major risk with potential serious impact on operations and works to enhance risk management as outlined in the Kawasaki Group Management Principles. To engage in continuous activities through implementation of the Corporate Risk Management System, we highlight the reinforcement of risk management as one of the key strategies of our Medium-term Business Plan. This system places ultimate responsibility for risk management operations with the President, and responsibility for the overall control of risk management operations with the Managing Executive Officer. The system also seeks to reinforce the risk management system by setting up a Corporate Risk Management committee with the function of deliberating on important matters relating to risk management and monitoring the status of implementation. Meanwhile, a secretariat function is given to the CSR Department, which directly reports to the President, to make different Corporate that each business division operates a similar system, for which the general managers of business divisions are responsible. These measures are designed to reinforce a system that takes a Group-wide approach to risk management. Additionally, a system that incorporates domestic group companies was started up in fiscal year ended March 31, 2013. We have also rolled out risk management activities to a number of our overseas affiliated companies (model companies) and plan to gradually extend this scope from 2015.

Risk Assessment

Assessment		
	Risk assessment metho	d
		The Kawasaki Group defines risk as factors and events that inhibit the execution of business operations or the achievement of organizational goals. With respect to risk exposures, such as strategic risks, we also take into consideration events than can have a beneficial effect for the organization, and cover all areas of risks—grouped into external risks and internal risks (strategic and operational risks) —for risk management.
		With respect to responding to major risks under the Corporate Risk Management System, major risks that can have a potentially serious impact on Group-wide operations are identified each year using uniform metrics and subjected to continuous management from a Group-wide perspective using efficient and optimal methods. Specifically, this means that management of major risks at the Group-wide level is carried out based on a Plan-Do-Check-Act (PDCA) cycle for managing major Group-wide risks using the following cycle: [1] screening and evaluation of risk; [2] identification of major risks and specification of risks requiring action; [3] formulation and implementation of risk response measures; and [4] monitoring.
		The Corporate Risk Management Committee defines serious risks that can have a potentially serious impact on operations as Group-level risk. Of these Group-level risks, those that are not being sufficiently addressed and urgently require Group-wide actions are specified as risk requiring Group-wide action.
		The Company's risk management process consists of a version of the COSO framework customized for the Company's systems and state of affairs. Moving forward, we will be further improving our activities through actions such as referencing the new COSO framework of 2017.

Long-Term Risks

Long-term risks 1	
	Large-scale disaster risks: Risks from large-scale disasters, including earthquakes and pandemics that can cause shutdowns or inability to maintain functions.
Potential Impact on O	Deerations
	Our business operations can be severely affected by natural disasters or pandemics that threat the safety of our employees. These risks can cause damage to our facilities, offices, assets and informational databases, as well as power outages that can cause delays in our delivery of products and services. These risks pose a serious threat to business continuation, leading to dramatic declines in our performance and share prices, major impacts on social communities, and loss of confidence among our shareholders. Ultimately, we may be rendered unable to fulfill its social responsibilities.
Risk Mitigation Measu	ures
	In preparation for crisis events, we have improved its crisis management system and laterally integrated the system in the overall group structure. The president is the Chief Crisis Management Officer. The heads of operating sites or organizational divisions function as Crisis Management Officers who oversee the setting up of their crisis management offices. In the event of an accident or natural disaster, all necessary information is sent to where it is needed through a predefined reporting route that has been set up for use in times of emergency. This route is made known clearly to employees and executives through the Crisis Management Organization, which in normal circumstances underpins the Group's crisis management structure.

Long-term risks 2

Long term holds Z	
	Information leakage risks
Potential Impact on C	Operations
	 Information safety related risks, such as system problems, blocking or attacks from external perpetrators, and accidents caused by intentional or negligent insider actions can have a direct or indirect impact on our business activities and result in situations such as outlined below. 1. System shutdown, loss of data or information theft caused by malware infections or network system hacking. 2. Loss, leak, removal from site or abuse of information resulting from intentional or negligent action. 3. Economic loss or loss of technological competitiveness resulting from illicit third-party use of critical information relating to bank accounts or technologies. This can also lead to serious incidents involving loss of reputation, damage liabilities, loss of confidence in the Kawasaki
	Group, or opportunity loss.
Risk mitigation measu	
rusk mugation measu	
	We have established a risk management system to handle information security management for the Group. We promote a management cycle, with an emphasis on rules, training and technology measures, to address information security risks that constantly change with the times, and we systematically implement, maintain and enhance information security measures.
	anes, and we system aloany implement, maintain and enhance mornation security measures.

	Training and awareness-building on risk management
	Kawasaki describes the importance of risk management in its grade-specific training programs. Additionally, our commitment to improve our enterprise value based on our select and concentrate, quality leads and quantity follows, and risk management guidelines are clearly stated in the Group Management Principles under our Mission Statement. We also post our Mission Statement at work areas and distribute Mission Statement Cards to employees to build awareness of these principles.
	HR evaluation and financial incentives The practicing of Group Management Principles, including risk management, is examined as part of the performance evaluation of executives.
	Checking and reporting of potential risks caused by employees We define and implement a compliance reporting and consultation system to identify any potential risks that may exist at the employee level.
	Internal feedback process on potential risks The incidents reported under the reporting and consultation system are regularly compiled and reported to management. Risk assessment is performed based on these reports.
Crisis Management	
	Crisis management principles The Kawasaki Group's Risk Management Regulations contain crisis management provisions set out in readiness for the emergence of a risk situation. These regulations set forth behavioral guidelines and response systems that serve to protect lives and preserve assets, minimize damage and loss, and expedite the resumption of business activities in the event of unplanned interruption. Additionally, the Kawasaki Group has formulated a business continuity plan (BCP) in preparation for a major earthquake centered on Tokyo or a similar major seismic event, or a pandemic caused, for example, by a new strain of influenza. The plan was formulated with attention to the following basic principles: 1.Protecting the health and the life of employees and their families (including non-employees working on site and visitors) 2.Performing of duties essential to the fulfillment of our social responsibilities (commissions from customers, business partners, and government offices, and maintenance and restoration of mission-critical systems such as public infrastructure and civil defense) 3.Normalizing the business operations of the Kawasaki Group 4.Fulfilling responsibilities and contributing to local communities
	Crisis Management Structure
	In readiness of risks, including any major disasters, we have put in place a Crisis Management Organization to operate as a crisis management system integrated horizontally across the Group structure. The president is the Chief Crisis Management Officer, while the head of each operating site or organizational unit (internal companies, business centers, etc.) acts as its Crisis Management Officer and supervises the setting up of a Crisis Management Office. In the event of a crisis, a command centers at Head Office, local works and offices are quickly set up which serves to protect lives and preserve assets, minimize damage and loss, and expedite the resumption of business activities in the event of unplanned interruption.

Export Control Policy	
	From the standpoint of ensuring safety by maintaining international peace and security, the Foreign Exchange and Foreign Trade Act (hereafter the "Foreign Exchange Act") regulates the export of materials or technology that could be diverted for military purposes, requires exporters to implement rigorous export controls, and defines fines and export ban penalties for offenders. Kawasaki's basic policy on export control is to contribute to the maintaining of security, and comply with the Foreign Exchange Act and other export control laws and regulations to mitigate any business risks that may arise from violations of these laws. Moreover, because our businesses have significant ties with the US, we take account of U.S. reexport regulations and economic sanctions in its export control procedures to reduce risks that may arise from violations of these laws.
Export Control System	
	To ensure Group-wide compliance with export control laws and regulations, we have formulated a set of corporate export control regulations for goods and technologies relevant to security maintenance and have put in place an export control system in which a representative director acts as Chief Export Control Officer. As a first measure, we set up the Export Control Laws and Regulations Compliance Screening Committee (hereafter the Screening Committee) at the Head Office chaired by the Chief Export Control Officer. The Screening Committee undertakes final assessment of all export transactions across the Group to confirm compliance with export control laws and regulations, and provides guidance and supervision to our internal companies to help them establish control systems that ensure legal and regulatory compliance. In addition, the Export Control Section was set up within the Head Office Marketing Division to provide secretariat services to the Screening Committee and to function as a Group-wide division to coordinate export control. Next, the Working Level Committee was instituted under the control of the Screening Committee, discuss matters delegated to it by the Screening Committee, report to the Screening Committee, and undertake horizontal rollout to internal companies of export control-related information. [Organizational chart] Export Control Structure
	https://global.kawasaki.com/en/corp/sustainability/mgmt/export.html
Export Control Trainin	
	The Company provides export control training for all companies, including Group companies, which are specifically designed for different personnel and objectives. To build awareness for export control, the Company organizes Group-Wide Export Control Training Meetings each year at a number of offices throughout Japan, such as the Akashi plant, with external lecturers invited from the Center for Information on Security Trade Control (CISTEC). Concurrently, each internal company offers export control training as a separate module in its grade-specific training to impart the knowledge required by managers and other personnel to execute their operations. Furthermore, training on the practicalities of determining applicability/non-applicability and transaction screening is provided for export control administrators or persons in charge of export control at each internal company. With regard to export control audits, the Corporate Auditing Department and the Corporate Export Control Section work together to perform individual audits of and provide guidance to all internal companies and major Group companies in Japan once a year. Moreover, overseas Group companies are subject each year to a questionnaire-based survey of their export control systems, export records and related matters, with appropriate guidance and support on export control provided by the relevant internal company.

Information Security	
	Information Security Management Policy
	The Kawasaki Group provides products to a diverse range of customers, from general consumers and the public sector to the Self-Defense Forces, and constantly works towards maintaining and improving its information security to protect information relating to our eventement of average and the second s
	customers and suppliers, as well as information on their businesses to suit the requirements of each customer sector.
	The necessary information security management practices have been established as corporate regulations to ensure compliance with prevailing domestic and international laws and in respect of contractual promises to clients and to protect our businesses from external risks. These corporate regulations comprise Rules for Information Management, as the underlying policy,
	along with various standards for establishing administrative management guidelines, including the use and implementation/development of information systems.
	Information Security Management Structure
	We have established a dedicated framework under the corporate risk management structure to handle information security management for the Group. We implement a management cycle, with an emphasis on rules, training and technology measures to address information security risks that constantly change with the times, and we systematically implement, maintain and enhance information security measures.
	In addition, the Group's data center has acquired ISO 27001 certification, the international standard for information security management, and strives to uphold a high level of operational reliability. We have implemented systems to prevent unauthorized access to data from outside as well as
	information leaks from inside and to stop the spread of computer viruses. We have also introduced systems to check for illicit activities.
	Information Security Education and Training We run education and training programs specifically on the information security theme for all Group employees.
	Education covers laws and social customs as well as corporate rules and incident examples, and course content is tailored to career level, such as newly hired employees, general employees and executives.
	Training programs use simulations, conducted on a regular basis, that help employees learn how to avoid damaging situations, such as cyber-attacks and online crime, which can occur in the course of daily business operations.
Intellectual Property Manageme	ent
	Principles of Intellectual Property Management
	To survive amid intense global competition, we must raise enterprise value by developing business pursuits that leverage our core competence. Toward this end, we rely on intellectual
	property, which is a vital management resource, and the key to securing and successfully applying this corporate asset is to undertake activities from a three-point perspective that adds intellectual property to business and R&D as a third component of our core competence.
	Intellectual Property Management Structure
	To promote these strategic intellectual property-oriented activities, we maintain a structure whereby the Intellectual Property Department in the Corporate Technology Division drafts corporate measures for implementation and works with other intellectual property management departments in each business segment. This provides support in line with each segment's business activities.
	[Organizational chart of intellectual property protection structure] https://global.kawasaki.com/en/corp/sustainability/mgmt/security.html
	Invention Reward System
	Based on the Patent Law regulation pertaining to inventions by employees, Kawasaki has established a provision in its internal rules regarding inventions by employees to reward employees at specific milestones, such as the filing of a patent application (application reward), patent registration (registration reward), and practical application (performance-based reward). The Operation (its adhead to be be be be been applied to be applied to be applied to be applied to be adhead to be adhead to be adhead to be adhead to be address of the adhead to be address
	The Company faithfully adheres to this provision. In addition, the same reward system is applied even when the invention is not made public for strategic reasons. Of note, the performance-based reward is fairly awarded after duly taking into consideration how the Company has benefited from the invention, using an evaluation standard based on comparisons with other companies in the same industry as well as trends in society.

Personal informati	on protection
	The Company abides by its Privacy Policy (Personal Information Protection Policy), a basic policy for protecting personal information. This policy is publicly disclosed. Further, the Company controls personal information and anonymously processed information by such means as appointing the personal information administrator, establishing the corporat regulations titled Personal Information Protection Rules, and issuing the Personal Information Protection Manual explaining the rules clearly for employees. In 2017, in response to the revision of the Act on the Protection of Personal Information of Japan, it revised related company regulations, the Privacy Policy, and the Personal Information Protection Manual, and implemented internal training and explanatory meetings for the affiliates several times. For the control of personal data, such measures are taken as constructing the security contror systems for the personal data possessed by division, and preparing and regularly updating the personal data handling ledger showing the handling of such personal data, such as disclosing it, no longer using it, etc.

Material issues and our	approach
	In the Kawasaki Group Management Principles contained in our Mission Statement, the Kawasaki Group sets forth our corporate virtue of recognizing social responsibility and coexisting harmoniously with the environment, society as a whole, local communities and individuals, and in the Kawasaki Group Action Guidelines, we ask each and every member of the Group to earn the trust of the community through high ethical standards and the example you set for others. Furthermore, we have established the Kawasaki Group Code of Conduct and set ethical standards to form the basis of decisions. At the same time, our executives and employees are requested to comply with the Code in the Regulations Concerning the Kawasaki Group Code of Conduct as a set of company regulations. The Kawasaki Group is committed to strengthening its corporate culture of not tolerating compliance violations in accordance with the Code. Furthermore, because a large percentage of our business comes from the sale of products ordered by customers such as government, municipalities, government ministries, and publicly run corporations, we must prevent corruption and maintain fair business practices.

Focus activities/medium-term targets

Our aim is to establish a state where the risks of compliance violations are checked as accurately as possible, and where comprehensive and effective compliance structures for addressing applicable risks have been put in place, are implemented on an ongoing basis, and regularly updated. Furthermore, we aim to establish a state where all officers and employees have an in-depth understanding of the corruption issue and the need for its prevention. A sufficiently effective structure for keeping the Group from becoming involved in corruption in its business activities has also been established and is being updated regularly.
has also been established and is being updated regularly.

Structure	
Structure	The Corporate CSR Committee, which is chaired by the Kawasaki president, meets at least twice a year (three meetings in fiscal year ended March 31, 2018). Its goals are to discuss and determine approaches that enable the Kawasaki Group to fulfill its corporate social responsibilities and to monitor the status of compliance efforts. To ensure that the objectives of the Corporate CSR Committee extend to all corporate structures, the Head Office and internal companies hold respective CSR committee meetings at least twice a year, in their effort to promote compliance throughout the Group. As a result of diversification of the Group business, the compliance activities required in the respective business divisions contain those specific to them according to their forms of business. On the other hand, there are not a few actions to be implemented across the entire company in a unified manner. For this reason, the Group is carrying out compliance activities; (i) as the compliance activity common to all internal companies with an annual compliance related theme set for all the internal companies in common; and (ii) as the business division specific compliance activity with another theme set for each business segment and the Head Office, respectively. [Organizational chart] Compliance Promotion Structure https://global.kawasaki.com/en/corp/sustainability/mgmt/compliance. html

Anti-Corruption

Anti-Corruption								
	Anti-corruption Policy Taking an even tougher stand against corruption, we established the Bribery Prevention Regulations in August 2013. Our basic policy states that the Kawasaki Group will uphold laws in the execution of business activities, and those bribes to public officials in Japan or overseas is not at all condoned. Additionally, the Company presents in its guidelines titled Basic Stance on Sales Promotion Activities toward Overseas Public Officials and Appointment of Agents, the basic ideas regarding the provision of travel expenses, food and drink expenses, gifts, facilitation payments in sales promotional activities as well as on the appointment of agents for negotiations with overseas public officials. In addition, we are implementing regulations with similar effect at domestic and overseas affiliated companies. Also, in the Kawasaki Group Code of Conduct, we clearly define "actions that individuals must take" to ensure correct conduct for each individual officer and employee as it relates to anti-corruption. Policy's scope of application All Kawasaki Group officers and employees Referenced document Kawasaki Group Code of Conduct https://global.kawasaki.com/en/corp/sustainability/business-conduct-guideline.html

Prevention of Insider Trac	dina
	For the purpose of preventing insider trading, the Company has established and continues to implement and regulate actions through its set of corporate regulations, the Insider Trading Control Rules. In addition, to further ensure the prevention of insider trading, the Company has established a new system in fiscal 2013 which obligates the Company officers and employees who intend to trade Company shares to notify the Company by the prescribed date (Treasury Stock Trading Prior Notification System).
Number of violations, d	Attails of violations, and actions taken Since 1989, when the amended Securities and Exchange Act which regulates insider trading was enacted, there have been no serious violations by the Group or Group employees that were subject to penalties or administrative monetary penalties.
Elimination of Antisocial F	Forces
	The Company resolutely rejects inappropriate requests from antisocial forces and undertakes various measures to break off any relationship with such forces. Specifically, in addition to what is described in the Kawasaki Group Code of Conduct and the Compliance Guidebook, we also publish the Manual of Responses to Antisocial Forces, and strive to promote awareness and full compliance with established internal practices and systems, as well as with prescribed procedures of response. In addition, we have established a unit at the Head Office to supervise responses associated with the elimination of antisocial forces. This unit works closely with the police and other external specialist organizations to establish an internal structure to systematically deal with inappropriate requests from antisocial forces.
Number of violations	letails of violations, and actions taken
	According to our survey of the period from 1997 to present, all inappropriate requests and requests for meeting appointments from antisocial forces and other similar organizations have been denied and eliminated during this period, and there have been no violations.
Measures to Prevent Mor	ney Handling Risks at Small-Scale Operating Sites Certain situations are unique to small-scale operating sites, such as regional offices and satellite branches. These organizations may be ill-equipped to perform sufficient checks, or may have particular individuals within the organization who have become fixed to a particular position due to difficulties in implementing personnel rotation. Based on such circumstances, a working group composed of relevant Corporate divisions has carried out reviews, improved the check manuals, and enhanced audits in order to reduce risks, particularly as they relate to the handling of money.
Number of violations, d	letails of violations, and actions taken
	Over the five years in the immediate past, there have been no cases of corporate misconduct that were subject to administrative disciplinary action or sanction.
Preventing Breaches of C	Confidential Information Because breaches of information cannot be prevented by IT measures alone, we implement measures in four areas—rules, control system, system countermeasures, and employee training and education—to enhance our safeguarding capabilities.
Number of violations, o	details of violations, and actions taken Over the five years in the immediate past, there have been no cases of corporate misconduct that were subject to administrative disciplinary action or sanction.

ESG

Open Innovation

Open Innovation Policy	
	In addition to leveraging the technological synergies that come from bringing our technologies together, we also work with outsourcers to introduce state-of-the-art technologies in an efficient manner. By making use of outside resources, and by not simply sticking to closed innovation, we are able to provide solutions to social issues as well as create value that we would not be able to offer singlehandedly, or offer only at large expenditures of cost and time.
Open Innovation Examp	
	Building a CO2-free hydrogen supply chain
	Four companies, KHI, Iwatani Corporation, Shell Japan Ltd., and Electric Power Development Co., Ltd. (J-POWER) have come together to form the CO2-free Hydrogen Energy Supply-chain Technology Research Association (HySTRA) to promote the building of a CO2-free hydrogen supply chain and have launched a full-fledged demonstration project.
Effects on Business a	nd Impact on Society
	Working under the HySTRA umbrella, these four companies will bring their strengths together to
	efficiently conduct R&D and demonstration projects. The demonstration projects of HySTRA consist of two technical components: the brown coal gasification technology, and long-range mass transport of liquefied hydrogen technology and liquefied hydrogen handling technology. The organization's goal is to launch demonstration projects and identify challenges that lie in the way of commercialization for each of the two components by fiscal 2020. An inexpensive and reliable supply of CO2-free hydrogen is critical in order to integrate hydrogen energy into society in the future. To realize such a hydrogen supply chain, KHI led a collaboration with Iwatani and J-Power to make a proposal for a demonstration project, which was accepted by NEDO (New Energy and Industrial Technology Development Organization) in June 2014 as the *Demonstration Project for Establishment of Supply Chain for Mass Marine Transportation of Hydrogen and Gasification of Brown Coal. Shell Japan has since joined the three companies to form HySTRA to work towards realizing an international commercial liquefied hydrogen chain going forward.
	J-Power, which is currently developing an integrated coal gasification combined cycle (IGCC) system, will primarily be responsible for demonstrations of their brown coal gasification technology which they have developed over the years. KHI, a supplier of cryogenic equipment which has built LNG storage tanks and receiving terminals as well as equipment for the rocket launching complex on Tanegashima Island; Iwatani Corporation, the only producer and supplier of liquefied hydrogen in Japan; and Shell Japan, Japanese subsidiary of Royal Dutch Shell which has a rich experience with LNG supply chains and carrier operation are working together to demonstrate technologies for long-range mass transportation and handling of liquefied hydrogen. In our future society, hydrogen gas turbines will play a key role in establishing an environmentally friendly, hydrogen-fueled energy supply system.

Open Ir	novation Example 2
	Joint venture with Sysmex to develop medical robots Medicaroid Corporation, a joint venture between Kawasaki Heavy Industries and Sysmex Corporation has released the operating table "SOT-100 Vercia" that realizes a wide range of patient movement that is required ability in hybrid operations.
Effec	on business
Effec	Leveraging the strengths of its two investors: Kawasaki, which has technological expertise in industrial robots, and Sysmex, which possesses testing and diagnostic technologies as well as a broad network in the medical field, Medicaroid makes positive contributions towards better product development and the advancement of the global medical industry. Since it commenced operations in October 2013, the company has been liaising with university hospitals and other members of the medical community as well as companies and government bodies, and has also been conducting marketing activities with a view to developing medical robots. Through these activities, the company has been developing product plans that take into account future medical trends and multifaceted commercialization possibilities. Medicaroid seeks to create an open-platform environment that encourages collaboration between different disciplines, including university hospitals and other healthcare institutions, as well as companies that possess specialized technology and government agencies that supervise regulatory approvals. The operating table "SOT-100 Vercia" can be moved easily and rapidly to the optimal position and posture in hybrid operating room. The physician is able to define these positions at will in the operating room. The table is able to store multiple positions data (position for administration of anesthetics, surgical operation, X-ray fluoroscopy, etc.) and reconfigure to these positions accurately and quickly.

	Product and service inno	
		(1) Aerospace System In addition to developing automation and robot technologies for improving efficiencies in the production of next-gen commercial aircraft, we are also developing innovative production technologies and working towards making factories smarter through the use of ICT/IoT. In the area of aircraft engines, we are engaged in R&D associated with compressors and combustor technologies, as well as for making productivity improvements.
		(2) Energy System & Plant Engineering We are engaged in product development with a vision of marketing to the international market, such as developing 100MW combined cycle power plants in addition to our technological R&D efforts to further advance the efficiencies of gas turbines and gas engines, which represent the key hardware for distributed power generating systems. We are also engaged in activities that meet the demands of effective resource use and environmental-friendliness, including the development of bio-mass boilers, upgrades and reviews on a new type of cement waste heat boiler, development of ICT/IoT-based combustion control and operation support technologies for thermal power plants, and the commercialization of high-temperature, high pressure boilers.
		(3) Precision Machinery & Robot We continue to improve the fuel efficiency and operability of hydraulic systems to secure a dominant share in the hydraulic equipment market for shovels. Furthermore, apart from shovels, with a vision of marketing our products to construction equipment and agricultural machinery segments, we are developing lightweight, high-efficiency and functionally enhanced hydraulic equipment in line with specific market demands, and developing these products into series lineups.
		In the field of robotics, we are developing a new robot system "Successor" which is equipped with an AI system that learns through cooperative work between the robot itself and a human technician performing work remotely, and is able to transfer skills by reproducing the movements of experienced technicians. We are also enhancing the functions of our dual-arm SCARA robot "duAro", as well as conducting R&D on medical robots with a vision of expanding into the medical and healthcare sector.
		(4) Transportation and Transport In the field of Ship & Offshore Structure Company, we are currently developing LNG/LPG propelled ships and LNG fueling ships in light of the implementation of stricter international environmental regulations going forward. Furthermore, we also develop underwater equipment including autonomous underwater vehicles (AUVs), and focus a considerable part of our development efforts to enhance the functions of SOPass, a ship navigation management support system that utilizes big data over ship-land communication. In the field of Rolling Stock Company, we are developing ICT/IoT-based train car and rail maintenance technologies, as well as technologies for reducing expenses associated with standard next-gen train cars. In the field of Motorcycle & Engine Company, we are moving forward with the development of provide the development of the standard provide acting the development of
		our next-gen, high efficiency engines centered around our supercharged engines, as well as new body packages. We are also engaged in the ongoing development of motorcycles that utilize ICT/IoT to deliver unprecedented riding experiences.
		(5) Hydrogen Road With a vision of realizing a hydrogen-based society where hydrogen is used en masse as an energy source, we are pushing forward with technological development for the early realization of a hydrogen supply chain from production and transport to storage and utilization (produce, transport, store, and utilize). This project has now advanced from the elemental technologies development stage to development and demonstration on a pilot scale, and is being implemented under closer collaboration between relevant business divisions and the Corporate Technology Division. With regard to liquefied hydrogen carrier, liquefied hydrogen storage tank and unloading stations, we have been steadily moving forward with NEDO's (New Energy and Industrial Technology Development Organization) demonstration project where we aim to complete our technological demonstrations by 2020 and subsequently move on to commercialization. As for hydrogen infrastructure facilities, we are pushing forward with the commercialization of the first industrial liquefied hydrogen system made in Japan, and hydrogen gas turbines.
Process Innovation	Process Innovation	
		 We continue to improve our quality and production efficiency by improving our production processes. Application of production simulations to production plans Application of 3D virtual assembly technology to the process of manufacturing ultra-large shield tunnel boring machines Application of FSJ (Friction Spot Joining) and FSW (Friction Stir Welding) to aircraft manufacturing Application of new metal treatment process (sheet stretchers) to aircraft manufacturing
	Effects of process inne	ovation While no Group-wide statistics of COGS figures (cost reduction effects) have been taken, they are being calculated on a project to project basis. For example, by applying production simulations to our hydraulic motor casing machining lines, we have been able to achieve a
		roughly 16% improvement in capacity utilization rate.
Environmental Innovation		
	Environmental Innovatio	At KHI, we define a set of in-house criteria to improve the environmental performance of our products through energy and resource conservation, and to reduce our environmental footprint by reducing the amount of industrial waste produced and chemical substances used in our production processes. Products that meet these criteria are registered as "Kawasaki Green Products." Kawasaki Green Products are marked with an environmental label that shows the product's environmental advantages as one way to communicate our efforts in this area to our customers and other stakeholders. This list of products contains a total of 50 products including the ten newly added in 2018.

Effects of environmental innovation		Years ended March 31	2014	2015	2016	2017	2018
	Reduction in environmental footprint	10,000 tons	74.1	51.3	74.5	89.8	2,292.4*
* The calculation method was revised in fiscal year ended March 31, 2018 to one which uses a flow-based method where the expected life of a product launched during this fiscal year is used as the evaluation period for calculating the difference in CO2 emissions between these our products and standard grade products in the industry over this period of usage.							

Material issues and our	approach
	While conducting the Group's business activities, it is essential to conduct procurement activities in line with our stance toward CSR that includes consideration for human rights, labor issues, occupational safety and health, and the global environment, in addition to compliance. Accordingly, we have to gain the cooperation of our business partners, in addition to the Kawasaki Group, and actively promote CSR activities throughout the supply chain.
Focus activities/medium	n-term targets
	We are committed to recognizing CSR risks throughout all supply chains and promptly responding to our customers' and societies' demands by working with our suppliers to drive our CSR activities.
• •••••	
Structure	Dreamont activities in our deily operations are carried out under the reaponability and
	Procurement activities in our daily operations are carried out under the responsibility and authority of each internal company. The Corporate Procurement Division holds a Procurement Department Managers Meeting once a year where directors of procurement are also in attendance. At this meeting, participants follow up on their KPI on procurement as defined at each internal company, share their activity plans for that fiscal year, and also decide on common Group-wide procurement actions and policies.

	Policy regarding our supply chains
	 The Kawasaki Group conducts procurement activities based on the following Basic Policies for Material Procurement. Fair and Impartial Procurements We will provide broad and impartial opportunities for our business partners, and will make selections with integrity and good faith after conducting comprehensive and fair evaluation of quality, price, delivery schedule, technological development capabilities, and other such factors. Relationships with Business Partners
	site informs business partners of our basic stance toward material procurement.
	Policy's scope of application
	The Kawasaki Group and our suppliers

CSR Procurement	
	CSR Procurement Initiatives
	We have released the CSR Procurement Guidelines on the website, where we request our business partners to strengthen their CSR efforts. Additionally, in fiscal year ended March 31, 2017, we conducted a questionnaire-based survey with domestic business partners to assess the status of compliance with these guidelines. Abo 1,400 business partners responded to the survey. Based on the results of the survey, we will execute measures to strengthen CSR efforts throughout our entire supply chain. In addition, we pursue CSR procurement on a global and Group-wide basis by disclosing its policies that conform to each business through the websites of the Group's domestic and overseas companies.

Supply Chain Risk Assessment Supply chain risk asse	ssment methodology In fiscal year ended March 31, 2017, Kawasaki conducted a questionnaire-based survey to domestic suppliers to assess the degree to which they were in compliance with our CSR Procurement Guidelines, and received responses from roughly 1,400 suppliers. Moving forward, we will be executing measures to strengthen our CSR efforts throughout our entire supply chain based on the results of this survey.

Compliance in Materials Procurement	ent
T	horough compliance in materials procurement
	 Each year, Kawasaki holds a group workshop intended for procurement divisions within the Group to ensure compliance with procurement-related laws and regulations, particularly the Subcontractors' Act (formally, the Act against Delay in Payment of Subcontract Proceeds, Etc. to Subcontractors) and the Construction Industry Law. Of note, with regard to the Subcontractors' Act, not limited to procurement department, we maintain proactive measures for dissemination and enlightening, as outlined below. In October 2009, we published a collection of examples of Subcontractors' Act violations, using actual cases in which other companies had contravened this law. In April 2013, we posted a checklist for self-auditing compliance status pursuant to the Subcontractors' Act on the corporate intranet. This checklist functions as a tool for identifying any administrative activities prone to violations of the Subcontractors' Act and for correcting such situations. Since fiscal year ended March 31, 2012, we have held sessions, mainly for design and manufacturing divisions at plants and major affiliated companies. In fiscal year ended March 31, 2018, the sessions attracted 823 participants. (Reference: To date, 5,116 people have attended the sessions.)
	manufacturing divisions at plants and major affiliated companies. In fiscal year ended March 31, 2018, the sessions attracted 823 participants. (Reference: To date, 5,116 people have

	Efforts regarding conflict	minerals
		In December 2013, Kawasaki posted its Policy Regarding Procurement of Conflict Minerals o its website, which states clearly that Kawasaki has no intention whatsoever of being party to conflicts or inhumane acts in the Democratic Republic of the Congo and neighboring countrie through the procurement or use of the tin, tantalum, tungsten and gold—so called conflict minerals—that are produced in these countries. Also, we ask our business partners to take similar efforts in the CSR Procurement Guidelines

Material issues and our	approach							
	The Kawasaki Group offers a huge variety of products ranging from transportation equipment such as ships, rolling stocks and aircrafts to industrial machinery such as gas turbines, engines, robots, and industrial plants, as well as leisure products such as motorcycles to a wide range of domestic and international customers. A critical part of our business is to reflect our customers' demands in our products as quickly as possible. In the Kawasaki Group, each six internal company forms a unique structure where information is shared within the internal companies to reflect this information for designs and after sale services.							
Focus activities/medium								
	Because our lineup of products is highly diverse, and also because of the differences between our B-to-B and B-to-C businesses, our business activities and goal setting for winning the confidence of our customers are based on the characteristics of each specific business. From a Group-wide perspective, one of our key activities is to establish and upgrade our feedback systems. The Corporate Marketing Division reaches out to different Business Divisions to gather customer comments, follow up on actions for building customer satisfaction, and also works towards sharing information and boosting compliance awareness through these activities.							
Progress/results/challen								
Frogress/results/challen	We have installed a contact page on our web site where customers and other stakeholders can							
	communicate their views (grouped by different business division and Group-wide). Since fiscal year ended March 31, 2014, the marketing division has been following up with business divisions on the status of web surveys, questionnaires, and interviews associated with customer satisfaction generally on a yearly basis. The establishment of a Group-wide feedback structure is listed as an item for consideration for fiscal year ended March 31, 2019.

Project Manager Training

In recent years, we have seen a rise in project-oriented businesses where we contract entire systems including peripheral facilities as opposed to selling standalone products. To this end, we have started new training programs in fiscal year ended March 31, 2017 to train project managers who are able to execute such projects. We are making Group-wide efforts to enhance our project management capabilities, specifically by holding Project Manager Seminars where we invite individuals from Kawasaki and third-parties with previous experience in large-scale projects as lecturers to impart the know-how required to lead projects to success, and also by implementing an internal study program where employees are transferred to other internal companies to acquire experience in large-scale projects.

our employees to continue working actively while balancing work with childcare and nursing care. Examples include a system of childcare leave available until employees' children reach age three; a short-time working system available tor up to three years; holding seminars to support those on childcare leave who wish to return to work as system whereby people can apply for reemployment when they are ready to return to work after resigning because of marriage, childbirth, child-raising, or other reasons; an a system that lets staff take time of in units of one hour at a time if needed to care for children or other family members. With initiatives in this area that go beyond national government standards, the Hyogo Labour Bureau certified us as a company supporting childcare, and awarded us the "Kurumin Mark" in 2010. Moreover, our systems have been further enhanced by such means as newly introducing in 2012 the Supplementary Work Day Nursery Service to offer temporary childcare services within company on supplementary work days and the Childcare Rescue System to offer baby-sitter services as designated b the company for employees requiring childcare services including nursing for sick or recovering children and during overtime duities or business trips. Kawasaki was rated highly for these activities and chosen as a "Nadeshiko Brand" in March 2015, a recognition given to companies that support women's careers and provide excellent support for work-life balance programs Employees using the care leave Years ended March.31 2014 2015 2016 2017 201 Male Number of employees 37 43 37 51 4 9 8 6	Supporting a Balance of Childe	care, Nursing Care, and W	'ork

Description of different support Systems (non-consolidated) Overview of Support Systems (non-consolidated)

Maternity/paternity leave	Employees may take leaves until a child reaches the age of three. There is no limit on the number of times to take.
Return to work support program "WIWIW"	Employees on maternity/paternity leave are provided with online services that enable them to get information and other materials to support their return to work, or allow them to enhance business skills, or promote communication with their office colleagues.
Leave to care for sick/injured child	Employees receive five days each year for each child up to completion of elementary school. Kawasaki does not set a limit on the number of children used to calculate a five-day leave. (Legally, companies are only required to provide a total of up to 10 days per year to employees with two or more children.)
Half-days off	Employees may take as many half-days off as necessary, within available annual paid leave, to care for a young child (up to completion of elementary school) or when morning sickness interferes with job duties.
Accumulated leave*	Employees may use accumulated leave to care for a young child (up to completion of elementary school), care for a sick/injured child, or when morning sickness interferes with job duties.
Use of flextime system	Employees may work on a flextime basis as necessary when looking after a young child (up to completion of elementary school) or when morning sickness interferes with job duties.
Limits on out-of -hours work and work on days off	Employees may be exempted from out-of-hours work and work on days off until a child completes elementary school.
Reduced working hours to care for young child	Standard working hours can be reduced up to a maximum of three hours a day until a child completes elementary school.
Nursing care leave	Employees may take leave up to three times for one person requiring nursing care (three years at longest).
Limits on out-of-hours work and work on days off for nursing care	Employees may be exempted from out-of-hours work and work on days off up to once a year.
Special leave for family care	Employees may take special leave of five days to care for an ailing or elderly family member. Kawasaki does not set a limit on the number of family members that employees must care for. (Legally, companies are only required to provide a total of up to 10 days per year to employees who have two or more family members in need of assistance.)
Half-days off	Employees may take as many half-days off as necessary, within available annual paid leave, to care for an ailing or elderly family member.
Accumulated leave*	Employees may use accumulated leave whenever necessary to care for an ailing or elderly family member.
Use of flextime system	Employees may work on a flextime basis as necessary when looking after an ailing or elderly family member.
Short-time working system for nursing care	Employees may shorten their working hours for at longest two hours a day (up to two times in three years).
Request for reemployment	Employees who resign to care for a child or an ailing/elderly family member may apply to be rehired when a change in their situation allows them to return to work.
	Maternity/paternity leaveReturn to work support program "WIWIW"Leave to care for sick/injured childHalf-days offAccumulated leave*Use of flextime systemLimits on out-of -hours work and work on days offReduced working hours to care for young childNursing care leaveLimits on out-of-hours work and work on days offSpecial leave for family careSpecial leave for family careUse of flextime systemJuse of flextime system for nursing care

* Accumulated leave refers to annual paid vacation days that could not be carried over to the next year

but can be taken in special circumstances.

Topic Enhancing On-site Nursery Facilities

A nursery has been established at Kawasaki Motors Enterprise (Thailand) Co., Ltd. since April 2010. The nursery provides temporary care for employees' children between the ages of one and four. As of March 2017, the nursery cares for the children of about 30 employees on a daily basis. Several more children are also registered at the nursery, and utilize it as necessary. The nursery is generally open from 7:30 to 17:15 to coincide with regular working hours, but if requested by more than a fixed number of employees, it is also made available during overtime or holidays.

The opening of the nursery means that parents can continue working with complete peace of mind, having left their children to be cared for nearby. From the employer's viewpoint as well, the loss of skilled human resources due to childbirth or childcare is avoided, promoting a stable and committed workforce. The opening of the nursery has thus proved to be a measure with mutual advantages.

In Japan, meanwhile, we provide nursery facilities at the workplace on supplementary work days to offer childcare for limited periods.

Work-Life Balance

Kawasaki encourages our employees to take their annual paid leaves to enable employees to
mentally and physically refresh themselves and to draw a clear line between work and private life by taking their leaves in a planned manner. To this end, Kawasaki implements two programs: the Yu-Yu Consecutive Holidays and the Anniversary Holiday programs. Under these programs, employees designate their paid leave days at the beginning of the fiscal year and take these days off without fail. The Yu-Yu Consecutive Holidays are two consecutive days off, and in conjunction with the Anniversary Holiday, employees can plan ahead to take three days off per year. Additionally, based on a labor agreement, three days in August are assigned as annual paid leave days, and nine consecutive vacation days are established including the Company's designated holidays and other holidays. Furthermore, labor and management have agreed to define one day per week as an on-time exit day since fiscal year ended March 31, 2007. By defining this on-time exit day, employees are able to achieve a well-controlled workstyle, which helps in improving their work-life balance.

Material issues and our	
	As value chains expand globally, respect for the human rights of our employees, suppliers, and other persons who are associated with our business has come to the forefront, and there is an increasing need for us to assess and address human rights risks in our Group-wide business activities. The Kawasaki Group upholds and respects the International Bill of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, the Guiding Principles on Business and Human Rights, and other international standards on human rights and labor. As a Group that conducts businesses worldwide, we have clearly stated our intentions to give human rights the highest priority, prevent human rights violations in all of our business activities, and not to contribute to any human rights violations.
Structure	
	The Corporate CSR Committee is responsible for deliberating on all human rights related efforts, and receiving reports on these activities.
Person in charge	
	Ikuhiro Narimatsu, Managing Executive Officer in charge of General Administration Division, CSR Division, Legal Division, and Compliance
Responsible body, co	mmittee
	Consolidated under the Corporate CSR Committee umbrella
Board of Directors' inv	volvement in human rights matters (reporting and deliberating)
	Reports on training and activities associated with human rights are given as needed in Corporate CSR Committee meetings.

Mechanism for Addressing Human Rights Related Grievances

Mechanism for addressing employee grievances										
Under its labor agreement, if a problem arises that cannot be resolved within the workplace,										
Kawasaki will set up a grievance committee, with participation from the director responsible for										
personnel and the president of the labor union, to quickly, fairly, and peacefully resolve the										
problem. The grievance committee handles a wide variety of issues, including health										
management and safety of union members, incidents of power harassment or sexual										
harassment, and matters related to personnel transfers. In addition, Kawasaki promises that no										
employee voicing a grievance will be put at a disadvantage.										

Specific examples of respect for human rights

Consideration Given to Employees at KMI (Indonesia)

PT. Kawasaki Motor Indonesia (KMI) is a local manufacturing and marketing base for Kawasaki-brand motorcycles in Indonesia. About 90% of the population of Indonesia is Muslim, and many of KMI's employees are followers of Islam. Therefore, various considerations are extended to these employees. The company has set aside an area on site for a mushola (prayer room). Female employees are allowed to wear a headscarf during working hours and, in the cafeteria, no dishes made with pork are served since dietary laws prohibit consumption of pork.

During the holy month of Ramadan, Muslims fast between sunrise and sunset, and through this month office hours for employees in administrative and marketing divisions start 30 minutes earlier than usual. This change reflects the desire of many Muslims to have their evening meal with family at home during Ramadan. Also, after Lebaran (a celebration to mark the end of fasting), which follows Ramadan, KMI holds a halal bi halal event for Muslims.

But Islam is not the state religion of Indonesia. In fact, there are Christian and Hindu minorities, and since the constitution guarantees religious freedom, Christmas and Hindu celebrations are also observed as national holidays. KMI therefore extends considerations to employees of Christian and other faiths and holds events, such as Christmas celebrations.

This demonstrates KMI efforts to accommodate the local religions, culture and customs of the land and execute business activities that respect human rights.

Policy on Social Contribution Activities	
· · · · · · · · · · · · · · · · · · ·	ntribution Activities
	 The Kawasaki Group implements social contribution activities in various fields based on the Group Mission, "Kawasaki, working as one for the good of the planet." We take advantage of our strengths and the capabilities of each of our employees for the activities. The emphasis is put on the areas below. (1) The Kawasaki Group, as a corporate citizen, constructs a good relationship with local communities and contributes to their development. (2) The Kawasaki Group supports the next generation who lead the future technology. (3) The Kawasaki Group preserves the environment and achieves the sustainable society.
Policy's scope of	
	The Kawasaki Group
Emphasized Areas in Our Social Contribution Activitie	
Emphasized area	in our social contribution activities
	Contribution to local communities
Overview (releva	nce to our business)
	We carry out activities for supporting sports and community exchange events, mostly in regions where we have offices or plants. In Okinawa, many of our employees have taken part in coral reef regeneration activities as
	volunteers.
Effects on busine	These activities help improve our presence in these communities.
Effects on societ	
	There have been numerous activities that were recognized and praised for their social contribution.
Emphasized area 2	in our social contribution activities
	Support for the Next Generation
Overview (releva	nce to our business)
	As a company that specializes in technological development and its widespread application, employees of the Kawasaki Group develop science education programs and hold handicraft and experiment courses for elementary school students in different communities.
Effects on busine	
	These activities help to increase employee motivation going forward, and also improve our corporate reputation.
Effects on societ	
	By carrying out these science education programs on a regular basis, we contribute to building children's interest in science.
Emphasized area	in our social contribution activities Realization of a Society Coexisting with Nature
Overview (releva	nce to our business)
	The Kawasaki Group upholds its contributions to the global environment as a key element of its Group Mission, and aims to create societies that coexist with nature. As part of these efforts, we are engaged in forest conservation activities in two locations: Hyogo Prefecture and Kochi Prefecture. This also helps to build environmental awareness among our employees and promote personal exchange with our communities.
Effects on busine	SS
	These activities help to build environmental awareness among our employees, and also improve our reputation as an environmentally sensitive company.
Effects on societ	We calculate and disclose the amount of CO2 absorbed through these forestation activities.
