

Delivering Value to Society Through Our

Commitment to the Environment

Formulating the Kawasaki Global Environmental Vision 2050

In light of the Paris Agreement enacted to restrict global warming and the Sustainable Development Goals (SDGs) adopted by the United Nations, the Kawasaki Group has announced that it will collaborate toward the realization of a sustainable society in the future, and formulated the “Kawasaki Global Environmental Vision 2050.”

The embodiment of the Group’s environmental management is based on the three visions of “CO₂ FREE,” “Waste FREE,” and “Harm FREE,” and the Group will contribute to controlling global warming, promoting a recycling-oriented society and protecting biodiversity toward the year 2050.

2050 Kawasaki Challenge!

*Activity Mark: Designed with the three challenges, imagining a “letter to the future.”

CO₂ FREE

- Aim for zero CO₂ emissions in business activities
- Provide products and services that greatly curb CO₂ emissions

Waste FREE

- Aim for zero waste emissions in business activities
- Thoroughly enforce conservation and recycling of water resources

Harm FREE

- Aim for zero harmful chemical substances emissions in business activities
- Develop business with respect for biodiversity

Initiatives for Environmental Management

As an initiative for environmental management, Kawasaki formulated the First Environment Management Activities Plan in 1994, and the entire Company started work on environmental conservation activities. Later, in 1999, we established the “Environmental Charter” to demonstrate our commitment to the environment both inside and outside the Company, and as a long-term vision, formulated the “Environmental Vision 2010” in 2003 and the “Environmental Vision 2020” in 2010. We implement specific environmental management activities plans based on the above and are steadily carrying them out.

With the realization of “Environmental Vision 2020” in sight, we have formulated the new “Kawasaki Global Environmental Vision 2050” with the aim of making a significant contribution to the global environment through products and services, in addition to zero environmental impact from business activities. Through steady environmental management activities constantly aiming for a vision that anticipates the times, we will make progress toward realizing the Group Mission “Kawasaki, working as one for the good of the planet.”

Kawasaki Global Environmental Vision 2050
(Established in 2017)

- CO₂ FREE
- Waste FREE
- Harm FREE

2030 Targets

- Reduce CO₂ emissions by 26% (Compared to fiscal 2014 level)

Environmental Vision 2020 (Established in 2010)

- Realization of a low-carbon society
