

STEERING GEAR SERVICE NEWS

DATE : 08.Nov.2019

No.: E0-19-002

SUBJECT : Termination of Manufacturing and Repair of Servo motors used in continuous control type Steering gear

We are very pleased to see you prosper as ever. Thank you very much for your special favor extended to us.

We have manufactured and sold our continuous control type steering gears(CR and CF type) in years from 1983 till 1986.

However, the manufacturer of the servo motors used in such steering gears has stopped manufacturing and repairing their products.

In response to this situation, we(Kawasaki Heavy Industries) stocked the completed servo motor.

However, in the past few years, sales have not been completed, and due to the aging deterioration of stocks, sales will be terminated this year (2019).

In addition, there are only a few servo motor currently in stock.
Please order early if you wish to purchase.
