**Kawasaki Links Up with TOMOHIROKAI to Expand
PCR Test Center at Kansai International Airport**
**New Clinic to Be Launched to Provide COVID-19 Testing and Certificates of
Negative Result**

December 8, 2021 — Kawasaki Heavy Industries, Ltd. announced their partnership with Medical Corporation TOMOHIROKAI to expand the capability of the PCR Test Center launched in September 2021 at Kansai International Airport (KIX).

TOMOHIROKAI will open the "Kansai International Airport PCR Test Clinic, Medical Corporation TOMOHIROKAI" on the fourth floor of Terminal 1 (International Departure Floor), beginning December 13, 2021, to offer pre-departure COVID-19 testing for international travelers.

In addition to PCR tests, the clinic will provide quantitative antigen tests and serum IgM antibody tests to accommodate various travel requirements. Kawasaki has been contracted by TOMOHIROKAI to conduct PCR tests using the automated robotic PCR testing system which Kawasaki previously installed at KIX. In order to improve services, Kawasaki will utilize this testing system along with the capabilities provided by its new partnership to issue certificates as early as three hours after a traveler's arrival at the Test Center's reception desk. It also aims to offer telemedicine in the future.

By expanding COVID-19 testing services at KIX, TOMOHIROKAI and Kawasaki hope to support the recovery of international flights.

1. Roles of TOMOHIROKAI and Kawasaki:

TOMOHIROKAI: Quantitative antigen testing, serum IgM antibody testing, medical consultation (walk-in or online), specimen collection, definitive diagnoses, and issuance of Covid-19 certificate for international travel.

Kawasaki: PCR testing, contracted operation of the PCR Test Center, including taking reservations, running the reception desk, collecting testing fees, and notifying travelers of results.
